OBJECTIVE

My personal goal is to work with a team that's as passionate about technology as I am. My objective is to enjoy work while delivering on business initiatives.

KEY SKILLS

Languages -
JavaScript, Java, Python, C#, VB.Net

Client -
HTML, CSS, Bootstrap, Tailwind, React.js

Server -
Node.js, Express.js

Database -
MongoDB, PostgreSQL, MySQL

Technologies -
API's, NPM, Git, Docker, Heroku, Linux

EXPERIENCE

2018 – 2020
Computer Programmer & Web Developer

- Constructed software projects using Java, C#, and Vb.Net. Incorporate both functional and OOP concepts. Leverage external technologies: JavaFX, Maven, and REST API's
- Construct web apps using MERN web stack including but not limited to: API calls, interacting with server, creating and fetching database information. All projects on GitHub repository and website.

2012 – 2020
Service Manager - Wells Fargo Bank

- Led team of eight in customer facing interactions. Daily direct coaching / feedback provided to team with successes & opportunities.
- Met daily, weekly, monthly deadlines for reporting and team member engagement activities. Team collaboration to succeed in compliance of internal documentation / security controls.

EDUCATION

A.A.S Computer Programming

Georgia Piedmont Technical College
2018 - 2020

ABOUT ME

- During my time in school we learned core concepts and best practices in computer programming with Java and C# building software. This knowledge is invaluable but my heart is in web applications specifically anything in the JavaScript ecosystem.

- Outside of programming I enjoy resetting at home with family. Extra time is spent feeding my fanaticism for MotoGP racing.
